

# Measuring the internal tool pressure

## Pressure transducer

### Contact

- ☎ +49-7224/645-57 or -45

### Sector

- Mechanical engineering

### Product

- Pressure transducer

### Features

- Sensor is fitted flush inside the tool
- IP 68 degree of protection
- Two-conductor electronics for good noise immunity
- Magnetic contacts

### Description

Measuring the internal pressure in hydraulically operated clamping tools enables sensitive adjustment of the workpiece-specific clamping force while ensuring minimum stress on the tool and its seals.
