

### **Pressure Transmitter**

# **MODEL 8227**

Flush diaphragm external thread G 1/4"

4-pin connector M12 x 1

### **Highlights**

- Measurement ranges of 0 ... 0.05 bar to 0 ... 500 bar
- Accuracy from 0.25 % F.S.
- Built-in instrumentation amplifier with output 0 ... 10 V
- Process connection thread G 1/4 inch
- Protection class IP65/67

#### **Options**

- Vaccum measuring ranges -1 ... +1 bar to -1 ... +10 bar
- Absolute measurement type
- Process connection thread G 1/2 inch
- Flush diaphragm in G 1/4 inch or M10 x 1
- Electrical connection M12 x 1
- Current output 4 ... 20 mA

### **Applications**

- Controlling and monitoring of production facilities
- Monitoring of hydraulic systems
- Cooling and air-conditioning systems
- Manufacturing systems

### **Product description**

With its rugged housing and a stainless steel sensor element, the transducer is particularly robust and ideally suited to the harshest environments. This also means that the sensor can be installed anywhere with no effect on the measurement signal. The built-in instrumentation amplifier converts the sensor signals into noise-immune voltage signals or current signals that can be transmitted over relatively long distances. For high viscose materials, a front-level membrane M12 x 1 is available, and with this disruptive dead volumes can be expelled.

The sensor has a small protected hole on the rear to allow measurement of atmospheric pressure (measurement type relative). For the absolute measurement option, the applied pressure is measured with respect to an enclosed vacuum.

As an electrical connection, a DIN 43650A valve connector or an M12  $\times$  1, 4-pin connection is available.

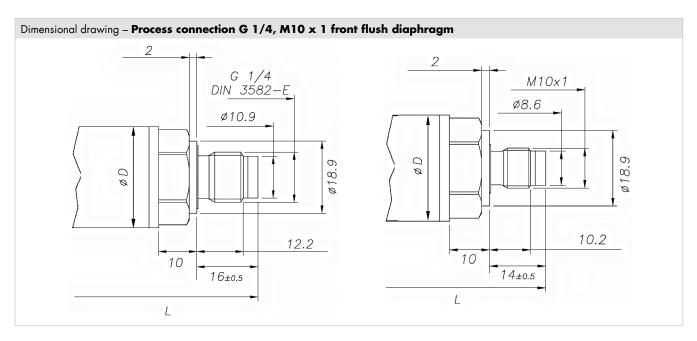

# **Technical Data**

8227	-	4050	4100	4250	4500	5001	5002	5005	5010	5020
Measuring range [bar] from 0		0.05	0.1	0.25	0.5	1	2	5	10	20
Accuracy										
Measurement accuracy (Combined error consisting of non-linearity, hysteresis and non-repeatability):			$\leq \pm 0.25$ % F.S. relative, $\leq \pm 0.5$ % F.S. absolute							
Dead volume at restored diaphragm						$0.5~\mathrm{cm^3}$				
Temperature effect on zero signal					±	0.02 % F.S.,	/K			
Temperature effect on characteristic value					±	0.02 % F.S.	/K			
Electrical values

Size A: L 82 mm, Ø D 22 mm; Size B: L 72 mm, Ø D 26.5 mm

Size in connection with option absolute messend (-V2xxx) always A

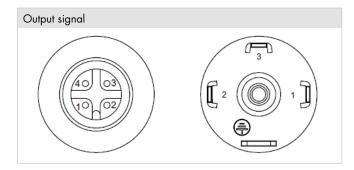

Size in connection with option -1 bar (-V3xxx) always B

Size in connection with option front flush (-Vxxx1) always B

For detailed dimensions, you can find the CAD data of the sensor on our website www.burster.de

# **Electrical connections**

Connection setting				
Pin	voltage output	current output		
1	Signal +	connection +		
2	common ground (GND)	connection -		
3	power +	NC		
4/E	housing	housing		

## **Accessories**

Order code	
99654-000C-0090030	Connecting cable with coupling plug EN 175301, 3m, open cable ends
9900-K304	Connecting cable with coupling plug M12 x 1,5m, open cable ends
99209-654B-0090030	Connecting cable with coupling plug EN175301 and Sub-D 9-pin, 3m, suitable for 7281, 9311
9900-V654	Mating connector coupling plug EN 175301 (included in scope of delivery)
9900-V624	Mating connector coupling plug M12 x 1, series 713 (included in scope of delivery)
8200-Z001	Sealing ring or 1/4" connection

# **Calibration**

Test and calibration certificate					
Included in scope of delivery of sensor	Amongst other data, includes figures for zero point, full-scale output and calibration offset				
Standard factory calibration certificate for load cells or measurement chains (WKS)					
Optionally available	Our standard factory calibration certificate includes 11 measurement points, starting at zero, spread evenly in 20% steps over the full measuring range, for increasing and decreasing pressure.				
Special factory calib	ration certificate for load cells or measurement chains (WKS)				
On request	We are happy to calibrate sensors and measurement chains to the customer's specification.				
DAkkS-Kalibrierschein für Sensoren und Messketten (DKD)					
Optionally available	Our DAkkS-certified calibration laboratory provides calibration certificates to DIN EN ISO 376. The calibration certificate includes 21 measurement points, starting at zero, spread evenly in 10% steps over the measuring range, for increasing and decreasing pressure.				

SIL2/ATEX certification on request.
